

ZURN® Carriers Meet Health Care Challenges

Today 127 million adults in the United States are classified as overweight, with over half considered obese. Of obese adults, 9 million are considered extremely obese or bariatric patients. Studies show that obese people require more health care than those who aren't considered overweight. The recent boom in gastric bypass, stomach reduction, and banding operations has also increased the amount of bariatric patients in hospitals.* To meet the special needs of bariatric care, Zurn has developed closet carriers specifically intended for these increased loading requirements. Our new carriers provide assured performance for bariatric care.

Carriers

Z1203-XH and Z1204-XH Extra Heavy Carrier Systems Support up to 750 pounds.

- This system provides paired performance up to 750 pounds behind the wall and 500 pounds at the closet fixture.
- Maintains additional support and a degree of safety, regardless of the restroom location.
- The use of a wall hung closet fixture provides a sanitary environment by keeping the toilet fixture off the floor.
- This system is designed for both new and retro-fit applications and maintains the use of 5/8" studs that are standard for all wall hung fixture installations.
- Specify the Z1203-XH for horizontal Extra Heavy Carrier needs and the Z1204-XH for vertical Extra Heavy Carrier requirements.

Z1203-XB and Z1204-XB Bariatric Carrier systems Support up to 1000 pounds.

- The Bariatric Room Design Advisory Board (BRDAB), created by The Hill-Rom Company, has targeted bariatric room maximum design for 1,000 pounds for chairs, beds, and toilet fixtures.
- The use of a wall hung closet fixture provides a sanitary environment by keeping the toilet fixture off the floor.
- The closet carriers are designed for new and retro-fit applications and maintain the use of 5/8" studs that are standard for all wall hung fixture installations.
- The closet carriers are provided with an integral finishing frame to square up the finished wall, reduce installation time, and provide added support.
- Specify the Z1203-XB for horizontal Bariatric Carrier needs and the Z1204-XB for vertical Bariatric Carrier requirements.

Closets

Z5610-XH 750 Pound Elongated Wall Hung Water Closet

- Paired performance of the carrier and closet guarantee performance and safe-guard against catastrophic failure from using different manufacturer's carrier and closet.
- 3 year Zurn One System warranty.
- Full compliance with ASME/ANSI A112.19.2M.
- 750 pound load rating when tested in accordance with ASME/ANSI A112.19.2M.
- 1.6 GPF, siphon jet type flush.
- Bright white anti-microbial epoxy coated type 304 stainless steel.
- Optional brushed stainless steel finish.
- Seamless construction.
- 1-1/2" male NPT flush valve top connection.
- 3-1/2" trap seal.
- Horn pocket for waste sealing gasket.
- Self-centering, non-shift seat design with integral molded bumpers.

Z5610-XB 1,000 Pound Rating Elongated Wall Hung Water Closet

- Paired performance of the carrier and closet guarantee performance and safe-guard against catastrophic failure from using different manufacturer's carrier and closet.
- 3 year Zurn One System warranty.
- Full compliance with ASME/ANSI A112.19.2M.
- 1,000 pound load rating when tested in accordance with ASME/ANSI A112.19.2M.
- 1.6 GPF, siphon jet type flush.
- Bright white anti-microbial epoxy coated type 304 stainless steel.
- Optional brushed stainless steel finish.
- Seamless construction.
- 1-1/2" male NPT flush valve top connection.
- 3-1/2" trap seal.
- Horn pocket for waste sealing gasket.
- Self-centering, non-shift seat design with integral molded bumpers.
